Retaliation may be present even when there is a finding that no violation of the rules or bylaws of U.S. Figure Skating occurred. Retaliation does not include good faith actions lawfully pursued in response to a report of a violation of the rules or bylaws of U.S. Figure Skating.

DE. Retaliatory conduct must be reported to the chair of the Ethics and Professional Standards, Grievance or SkateSafe® Committee. Any member engaging in retaliatory conduct will be subject to disciplinary action in accordance with Article XXV, Section 1, of the U.S. Figure Skating bylaws.

GR 1.06 Jurisdiction

U.S. Figure Skating is a member of the International Skating Union (ISU), an Olympic/Pan American member of the United States Olympic and Paralympic Committee (USOPC) and an allied member of the Amateur Athletic Union of the United States (AAU). As such, U.S. Figure Skating observes the rules of the ISU, including but not limited to the ISU antidoping rules, and administers its own rules so as to ensure the eligibility of qualified United States skaters and officials to participate in international skating events. In addition, the purpose of the official rules of U.S. Figure Skating, and in particular those rules relating to eligibility and sanctions, is to protect the eligibility of registered members so as to enable them to fully participate in the benefits of such membership.

GR 1.07 Any current or past member (living or deceased) who has been permanently banned from U.S. Figure Skating by U.S. Figure Skating or in accordance with measures enacted by the U.S. Center for SafeSport will be removed from the U.S. Figure Skating Hall of Fame and stripped of all U.S. Hall of Fame recognitions. 1050 Calculation of Results – ~~6.0 (CJS)~~ and IJS

1060 Calculation of Results – ~~6.0 System (CJS)~~

1061 CJS Basic Principles of Calculation – All Skating Disciplines

Computer placements utilizing the currently approved software program (rule 1232) are regarded and used as the official result. U.S. Figure Skating reserves the right to incorporate revisions or clarifications made by the ISU at any time after the revision or clarification is issued.

A. Total program score for each segment

1. There are three program components.
2. Each program component receives a mark from the judge on a scale of 0.25 to 10.00, in increments of 0.25.
3. The panel's points for each program component are obtained by calculating the trimmed or simple mean of the judges' scores for that program component. When there are five or more judges, the trimmed mean is calculated by dropping the highest and lowest marks from the panel and calculating the average of the remaining marks. When there are four or fewer judges, a simple mean will be used as provided for in rule 1235 (C)(1).
4. The panel's trimmed mean (or simple mean) score for each program component is rounded to two decimal places and then multiplied by the individual program component factor. The factored results are rounded to two decimal places and then multiplied by the general component factor. The factored results are rounded to two decimal places and added. The sum is the skater's/team's total program score for the segment.
 - a. The current program component and general component factors are included in the IJS Parameter Factor

Charts posted on the Skating Rules & Resources page.

B. Deductions are applied for each violation

1. For deductions for singles and pairs, see the Singles Skating Rules & Resources page and the Pairs Skating Rules & Resources page, respectively, on usfigureskating.org.
2. For deductions for ice dance, see the Ice Dance Rules & Resources page on usfigureskating.org.
3. For deductions and reductions in synchronized skating, see rule 9923.

1062 Determination of Results in Each Segment of a Competition – CJS

- A. The total segment score for each skater/team in each segment of a competition (short program, pattern dance, rhythm dance, free skate and free dance) is calculated by subtracting any deductions for violations in accordance with the rules of the particular discipline from the total program score.
- B. In ice dance, for events with two pattern dances, the total score for each pattern dance will be multiplied by a factor documented on the Skating Resources & Rules page.
- C. The skater/team with the highest total segment score is placed first, the skater/team with the next highest total segment score is placed second, and so on.
- D. If two or more skaters/teams have the same total segment score, they will be considered tied.
- E. For any segment where a segment factor is applied, the factored segment scores are rounded to two decimal places.

1063 Determination of the Final Results

- A. The total segment score for each segment is multiplied by the current segment factor and then added. The result constitutes the final score of a skater/team in an event.
 1. The current segment factors used to determine combined and final results are included in the IJS Parameter FactorCharts posted on the Skating Rules & Resources page.
- B. The skater/team with the highest final score is first, etc.
- C. In case of a tie in total segment score for any combined result or final result, the skater/team with the highest place for the last segment skated will prevail.
- D. If there is a tie for the last skated segment, the placement of the next previously skated segment will determine the better place, etc. If there is no previous segment, the skaters/teams are tied.
- E. In ice dance, if two pattern dances are to be skated, both dances are even in value. There are no tie-breaking criteria for the combined result after the second pattern dance.
- F. No final placements will be recorded for competitors or teams who do not complete an event. The only placement recorded for such competitors will be the placement earned for the part of the event they completed and for which placements were determined

~~**1061** The chief accountant is responsible for the accuracy of the computations including the placement of the competitors, subject to verification by the referee. Computer placements utilizing a currently approved software program (rule 1232) are regarded and used as the official result.~~

~~**1062** The following results will be calculated during the course of an event, as appropriate:~~

- ~~A. All individual segments of the event;~~

- B. Intermediate results after the second and each succeeding segment of a multi-segment event;
- C. Final results of the event determined from the sum of the factored places of each segment of the event. This calculation will be performed in accordance with rules 1063 through 1066 as appropriate.

1063—Determination of Total Marks (TM) in Each Segment of a Competition—6.0 System

- A. Free skate events (singles, pairs and synchronized skating):
 1. The short program marks for technical elements and program components are added. The sum is the total marks (TM) for the short program.
 2. The free skate marks for technical elements and program components are added. The sum is the total marks (TM) for the free skate.
- B. Ice dance events:
 1. In the initial round or final round, marks for technical score and program components are awarded to each pattern dance. The sum of the two marks is the total mark (TM) for that pattern dance.
 2. The rhythm dance marks for technical score and program components are added. The sum is the total marks (TM) for the rhythm dance.
 3. The free dance marks for technical score and program components are added. The sum is the total marks (TM) for the free dance.

1064—Determination of Ordinal Numbers in Each Segment of a Competition—6.0 System

In all segments of an event, ordinal numbers for each judge for each competitor, couple or synchronized team will be determined based on the total marks; the competitor(s) receiving the highest total marks receives ordinal 1; the next highest ordinal 2, etc. If a judge has given two or more competitors equal total marks, the tie is broken as follows:

- A. Pattern dances: The couple with the highest mark for technical score receives the lowest ordinal number. If the marks for technical score are also equal, the couples are tied.
- B. Short program: The competitor with the highest mark for technical elements receives the lowest ordinal number. If the marks for technical elements are the same, they are tied.
- C. Rhythm dance: The couple with the highest mark for technical score receives the lowest ordinal number. If the marks for technical score are the same, they are tied.
- D. Free skate (singles, pairs and synchronized skating) or free dance: The competitor with the highest mark for program components receives the lowest ordinal number. If the marks for program components are the same, they are tied.
- E. If two (2) or more competitors are tied by one judge in a segment of an event, each competitor receives the ordinal number for the tied place. The next higher ordinal or ordinals are not assigned, based on the number of competitors tied for the same ordinal number. For example, if two competitors are tied for ordinal 1, then ordinal 2 is not assigned; if three competitors are tied for ordinal 1, then ordinals 2 and 3 are not assigned, etc.

1065—Determination of Results in Each Segment of a Competition—6.0 System

The ordinal numbers determined for each judge are considered placements for the competitor.

- A. (M) Majority: The competitor(s) placed first by the absolute majority (M) of judges is first; the competitor(s) placed second or better by an absolute majority of judges is second and so on. In determining a majority for second place, ordinal numbers 1 and 2 are considered as 2; in determining a majority for third place, ordinal numbers 1, 2, and 3 are considered as 3; and similarly for the remaining places.
- B. If two or more competitors are tied for the same place, the ties will be broken by the application of the following rules in the following order:
 1. (GM) Greater majority: If two or more competitors have obtained a majority of judges for the same place, the place in question will be awarded to the competitor with the greater majority (GM) of judges making the placement.
 2. (TOM) Total ordinals of majority: If two or more competitors have received majorities for the same place from the same number of judges, the place in question will be awarded to the competitor with the lowest total ordinals from those judges forming the majority.
 3. (TO) Total ordinals: If two or more competitors receive the same TOM, the place in question will be awarded to the competitor with the lowest total ordinals (TO) from all judges.
 4. (TIED) Tied: If two or more competitors receive the same TO from all the judges, the competitors are TIED.
- C. (BT) Broken tie: If two or more competitors are temporarily tied with majorities for the same place, the place must be awarded to one of the competitors on the basis of rule 1065 (B). After awarding this place, the remaining temporarily tied skaters must be awarded the next following place(s) on the basis of rule 1065 (B) without considering any additional competitors.
- D. (LM) Lowest majority: In awarding the subsequent places thereafter, the competitor with a majority for the lowest numbered place will be given first consideration.
- E. (SM) Subsequent majority: If there is no absolute majority for any given place, the place in question will be awarded to the competitor with the majority for the nearest following place. If the sums are equal, then rule 1065 (B) must again be applied.

1066—Determination of the Intermediate and Final Results for Multi-Segment Events—6.0 System

- A. Intermediate placements, when computed, are the placements for the segments of the event that have been completed thus far. For intermediate results, the results determined in accordance with rules 1063-1065 for the segments

~~included in the intermediate results will be multiplied by the appropriate factors and added together to give the intermediate factored placements.~~

- ~~B. For the final results, the results determined for each segment of the event in accordance with rule 1063-1065 will be multiplied by appropriate factors and added together to give the total final factored placements for the event.~~
- ~~C. The best placement is assigned to the competitor having the lowest factored placement determined above and the next place to the competitor with the next lowest factored placement, etc.~~
- ~~D. The factors and the conditions for breaking ties in the total factored placements are available on the Members Only site under the "Accounting Central" link.~~
- ~~E. When two competitors are tied, the next place is not awarded; when three competitors are tied, the next two places are not awarded.~~
- ~~F. No final placements will be recorded for competitors or teams who do not complete an event, and the only placement recorded for such competitors will be that earned for the last segment of the event in which they competed and for which placements were determined.~~
- ~~G. Results from qualifying rounds will not be factored and will not be used to determine final placements.~~

1212 The chief referee will:

- A. Act as chair of the judges;
- B. Assign judges, substitute judges and referees to the events;
- C. Draw the numerical order of the judges;
- D. Together with the technical panel captain, assign technical panel officials to IJS events for qualifying competitions.
- E. Assign technical panel officials to IJS events for nonqualifying competitions;
- F. Be responsible for the scheduling of events in consultation with the host club;
- ~~G. Together with the chief accountant, be responsible for seeding skaters;~~
- ~~H. G.~~ Direct the dance referee, if designated, to:
 - 1. Be responsible for selecting the music for pattern dances that are not designated as "skaters' choice" dances;
 - 2. Check the music's metronome (tempo) both before the competition and during the warm-ups;
- ~~I. H.~~ Decide all protests, including protests from the decisions of assistant referees, except when an expedited hearing is requested in accordance with Article XXV, Section 1, of the U.S. Figure Skating bylaws;

NEW BUSINESS

Items 601, 603 and 604 were ruled out of order.

602. APPROVED – Daren Patterson, Knoxville FSC

We propose regularly scheduled communication opportunities, not less than one a quarter, that allow the U.S. Figure Skating Board of Directors, clubs, and members to exchange information, ideas, concerns and board actions.

These sessions would be similar to the vice president calls from previous years, and would provide opportunities for varied U.S. Figure Skating board members to engage with the membership. Implementing better communication provides transparency, builds confidence in the organization and creates a stronger skating community.

In addition, when other skating community calls occur, e.g. Club Connections, there should be at least two board members participating.
